# Human Resources - Child Care

In our Child Care Program you will learn about child growth and development, providing a safe and healthy learning environment for children, identifying a child's basic needs, communicating effectively with children, dealing with crisis situations, creating a nurturing learning environment, planning, scheduling and implementing age-appropriate activities, providing constructive discipline and displaying a professional attitude.

The course consists of both classroom work and laboratory experiences. During labs you will implement the knowledge you have gained through the classroom work. Most importantly, students will help each child develop a positive self-concept by showing the child that he/she is special and unique as an individual.

During the second-year course you will prepare for the CDA (Child Development Associate) credentials. Our goal is to prepare you to operate a licensed child care center in the state of Missouri.

## Job Opportunities

- Licensed home child care provider
- Licensed day care center employee or Director
- Licensed Head Start Instructor
- Pre-School Instructor

## Requirements to be enrolled in our Child Care Program.

- A true desire to work with children
- Child Abuse/Neglect Screening
